## Dana Wildland Urban Interface

### FUEL REDUCTION PROJECT

The Fall River Resource Conservation District (RCD) is partnering with Sierra Cascade Land Stewards, Inc. and Cascade Resource Consultants, LLC—local forest management consultants—to offer a grant-funded forest fuel reduction project in the Dana area. The *Dana WUI Fuel Reduction Project* is designed to help protect the community of Dana from Wildfire. Funding for this opportunity is provided by CAL Fire’s Fire Prevention Program as part of the California Climate Investments Program, which means you could have your property treated at no cost to you.

The first phase of operations is anticipated to commence in the late summer of 2023; depending on enrollment, there may need to be a supplementary phase next year. An introductory packet was recently sent out to eligible landowners’ mailboxes. Interested landowners can also scan the QR code below to sign up online. Enrollment needs to be completed by the end of June 2023.

**Right: After Treatment**

\*These photos were taken during a similar fuel reduction project that received hand-thin and chip treatment.

Community members are encouraged to attend the Fall River Valley Firesafe Council meeting on Thursday May 25, 2023 at 7 p.m. at the Soldier Mountain Volunteer Fire Department where questions about the project can be answered.
